

As part of our final Branch in our RE we worked together to create a Bible timeline, showing how scripture from the Bible can correlate and sometimes deviate from periods of time in History. The children work really well together to create their final pieces and put them together to make one huge timeline!

In History we enjoyed learning about the Maya civilisation including their number and alphabet system. We learnt about what the city states were like and recreated our own ancient Maya city states! Can you spot our ancient temples?

We had the best time during our trip to the playground, with beautiful weather we were glad to jump into some rather large, muddy puddles. The resilience and determination of the children was incredible and I felt so proud seeing all of the children at least attempt obstacles, even if they were unsure about them at first! The children enjoyed the opportunity to join in a 'giant splash' ensuring every inch of me was covered in water (don't worry I managed to get out before I swallowed any)! The children have been on an incredible transition this year and I was so proud hearing them all encourage each other and cheer each other on— that is what makes these guys such a great class— the team spirit! I will miss teaching them!
