

In science, we have been learning all about the digestive system and food chains. The class did an exciting and messy experiment to model a human digestive system.

We used everything we had learnt to write some very detailed and accurate explanatory texts on the digestive system in our writing lessons.

Year 4 have also been having great fun in PE. This term, we have had special lessons from a cricket coach who has been teaching us lots of important skills and techniques. We also loved taking part in the London Mini Marathon which involved us running 28 laps of the school field over the course of a week.

As you can see, Year 4 have had another busy half term. In maths, we have been becoming experts in fractions, improper fractions and mixed numbers. We are now able to compare, convert, add and subtract fractions.

In writing, as well as our excellent explanatory texts, we have been working on using persuasive language in an advert and using informal tone in a diary entry.

In reading, we have been exploring the fantastic Varjak Paw. We have been developing our comprehension skills in a variety of ways while reading the text.

We have started a new history topic about Ancient Egypt and are very excited for our history day next half term!

In RE, Year 4 have been finding out about the early church and how St Peter was the first pope. We then found out more about how the church is structured today. We have learnt that the church is apostolic and have thought about how we can continue the mission of the apostles in our lives.
